PERSONAL PROJECTS

Weather Application

- Developed a dynamic weather application using React.js, integrated with external weather APIs to deliver real-time weather updates, featuring a responsive and user-friendly interface for enhanced accessibility.
- <https://weather-zpqr.vercel.app/>

Crypto Tracker

- Created a cryptocurrency tracking application using React.js, incorporating real-time market APIs to display live price updates and market trends, designed with a responsive layout for seamless user interaction.
- <https://crypto-tracker-ten-pi.vercel.app/>

Multiple Disease Prediction System

- In this project i made a prediction model which was deployed on web using sklearn.
- This model can predict disease using pre trained dataset.

CERTIFICATES

Meta frontend development

I participated in a front-end development course offered by Meta, where I learned key concepts of front-end development. Throughout the course, I completed assignments that sharpened my skills in HTML, CSS, JavaScript, React.js, Bootstrap, and GitHub

Simplilearn Javascript

I completed a JavaScript course with Simplilearn, where I gained a solid understanding of JavaScript fundamentals and its importance in front-end development. The course covered key concepts like functions, objects, and DOM manipulation, allowing me to create interactive and dynamic web pages

Simplilearn React

I completed a comprehensive React.js course offered by Simplilearn, which focused on teaching the foundational concepts of React.js. Throughout the course, I gained hands-on experience in essential front-end development technologies, including HTML, CSS, JavaScript, Bootstrap, and GitHub.
